

# **Johnny Can See**

## **A Visit to the Eye Doctor**

### **Translated from Singapore Chinese Newspaper/Lian He Wan Bao (25<sup>th</sup> October 2009)**

Getting children to cheerfully go for an eye examination

Younger and younger people are getting such eye problems as short sightedness, astigmatism and weak eyesight. Parents are aware of the importance of getting the eyes of their young children examined. But taking them for such an examination is quite a difficult task to accomplish.

Now there is a very good aid to assist parents to get their young children ready and willing to undergo an eye examination, thus saving parents a lot of headaches.

To celebrate its first anniversary, EyeWise Vision Clinic has produced a children's book entitled "Johnny Can See" to reassure and encourage children with eye problems to go for an eye examination. It tells the story of a little boy named Johnny who is unable to participate in his favourite everyday children's activities like playing football owing to his eye problems. He goes for an eye examination and discovers that it is in fact a very interesting experience.

The author Benita Fong has more than 10 years experience in childhood education. The book is available in all major bookshops. Information on the book can also be found at <http://www.johnnycansee.com>.
